

Presents

'Ohana Night at the Energy Lab 6 to 8 p.m. - March 14

FEATURING:

Dr. Bill Wiecking, director of the Energy Lab at Hawai'i Preparatory Academy
Energy In and Out: How to Capture and Conserve Energy in Your Home

Families will bring a list of home appliances to aid in calculations and will take home sketches of home systems.

Wiecking, who was intimately involved with the development and design of the Energy Lab at Hawai'i Preparatory Academy, teaches AP Environmental Science and Green Technology II at the school. He is a frequent presenter at Macworld and at conferences focusing on wireless networks and educational technology. He has been recognized with numerous awards, including Apple Distinguished Educator, GTE GIFT Fellow, Tandy Technology Scholar, and the HPA Ellbogen Meritorious Teaching Award.

The event is free and open to the public.

'Ohana Night at the Energy Lab, which runs from 6 to 8 p.m. on the second Wednesday of each month, provides hands-on learning opportunities for families in the areas of energy and water conservation, energy generation, water clarification, zero waste, food sovereignty, and green chemistry. Future 'Ohana Night at the Energy Lab events will feature:

WEDNESDAY, APRIL 11

Angela Kang, Hawai'i County Recycling Specialist
Zero-Waste Your Home and Office

WEDNESDAY, MAY 9

Deacon "Dr. Beachcomb" Ritterbush, Ph.D.
Connecting to Nature Through Beachcombing
