Each panelist has been asked to outline 2 – 4 issues or initiatives which he/she feels are critical to moving our island toward greater food self-sufficiency and indicate reasons for the choices and ways the public can advance these initiatives. There will be time for questions afterwards.

The results of this panel discussion will be carried over to the November 7th E Malama Aina Festival where these and other issues can be discussed more fully.

Our State imports roughly 85% of the food it consumes. This puts us in a precarious situation in a world with so many uncertainties. Every citizen should take note and be asking what needs to be done and how we will accomplish it.

Please join us and share your thoughts and concerns.
