

Seed Variety Selection Tool for the Hawaiian Islands

Plant Hardiness Zone Map for Hawai'i County (Hawai'i Island)

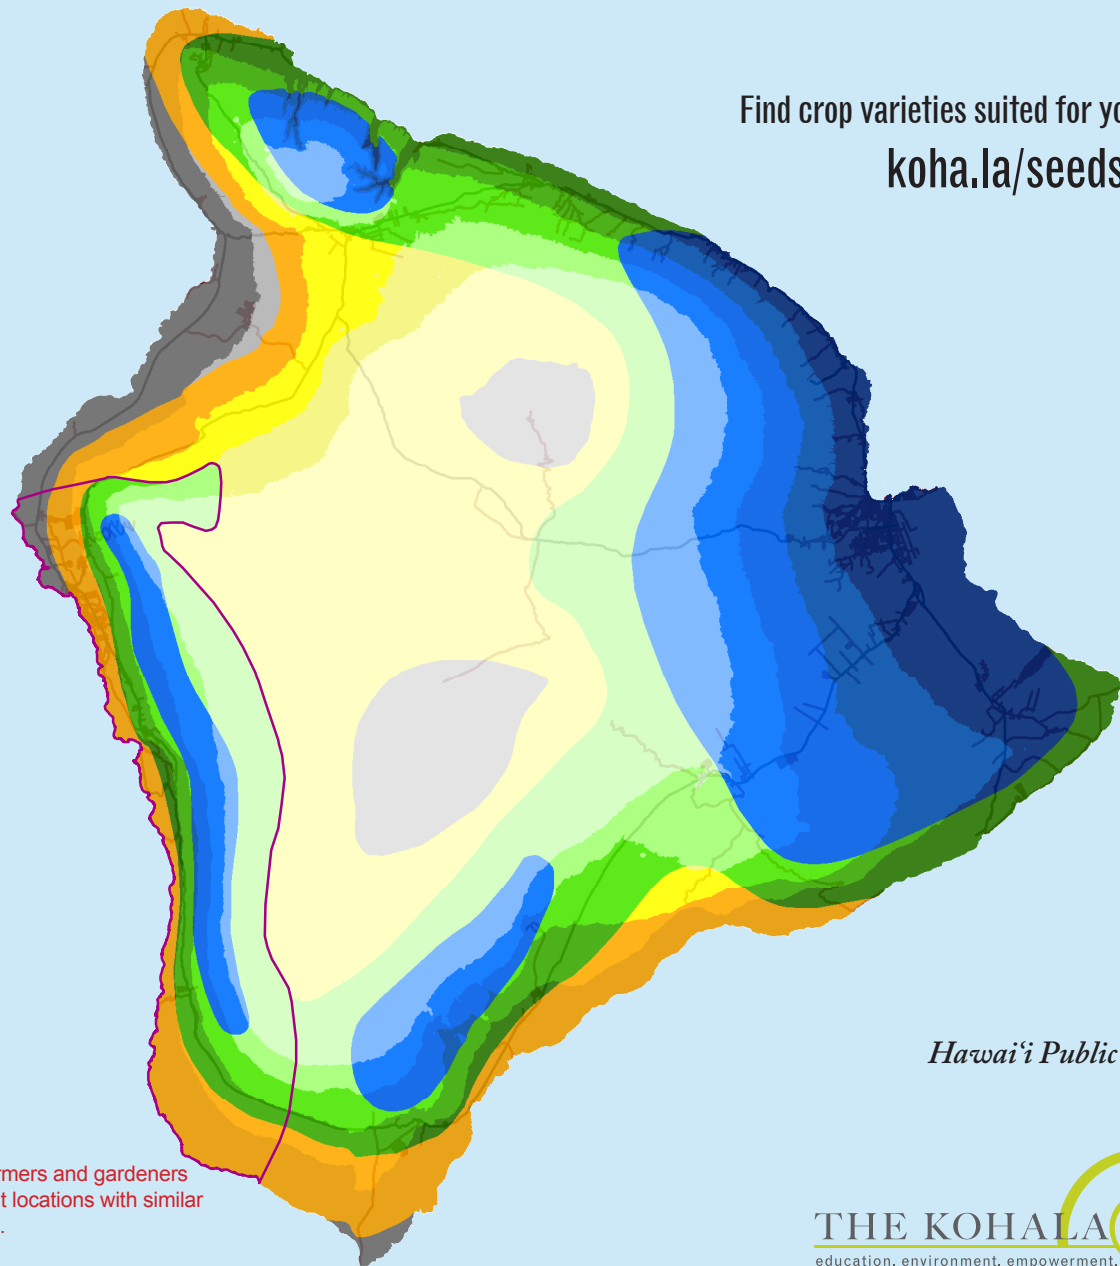

Find crop varieties suited for your zone at koha.la/seedselector

SOUTH KONA ZONE: The southwest portion of Hawai'i Island experiences a different rainfall pattern than the rest of the Hawaiian Islands. This zone is typically drier in the winter and wetter in the summer. If you live within the South Kona Zone (indicated on the map), you may wish to plant in the opposite season from others in the same zone who are not in South Kona.

Zone 1: Arid
Zone 2: Dry
Zone 3: Mesic
Zone 4: Wet

Zone A: Below 1000ft
Zone B: 1000ft - 2000ft
Zone C: 2000ft - 3000ft
Zone D: 3000ft - 4000ft
Zone E: Above 4000ft

NOTICE: This map is intended solely as a communication tool for farmers and gardeners to share information about the relative success of varieties in different locations with similar growing conditions and may not be appropriate for other applications.
